## **How Has NWSEO Benefited You?**

~Steve Listemaa, ITO  
WFO Peachtree City, GA

*“The ITO position continues to play a key role at NWS offices, performing such tasks as systems administration, software development and support, and documentation and training.*

*Since I became an ITO in 2002, the technological needs of an NWS office have greatly increased, necessitating the need for the ITO position to handle these tasks. The NWSEO, especially General Counsel Richard Hirn, has worked tirelessly to save the ITO position year after year, and I am beyond appreciative that folks are fighting for the ITO position!”*

NWSEO has saved the ITO position every year since 2012. Congress realizes how valuable NWS ITO's are because ***NWSEO has repeatedly, every year, made them an important part of their lobbying strategy.***

It takes intense lobbying and **outreach efforts to inform Congress about the important work you do.** NWSEO lobbying, the time and financial resources invested in saving your job, comes at a great cost to our professional organization. The united work of your NWSEO co-workers and ITO members are key factors in this success. We need your membership support in order to continue our efforts.
